Abstract (en)
[origin: WO2016138888A2] The invention relates to a spray gun having a base body, a liquid-conducting means and a fastening nut, wherein the thread has a recess and the liquid-conducting means at least one element which is radially projecting from a central liquid-conducting tube, said element fitting into the recess, so that, after unscrewing the fastening nut, the liquid-conducting means can be gripped at the projecting element in order to withdraw the liquid-conducting means from the base body. The invention further relates to a set comprising a liquid-conducting means with a liquid-conducting tube, in which is arranged a sleeve with a bore.
