Abstract (en)
[origin: WO2016139170A1] Packaging comprising: a housing for containing products, said housing comprising an opening arranged to allow access to such products; a lid movable with respect to the housing between a closed position in which said lid prevents access to said opening and an open position in which the opening is accessible; magnetic closing components arranged to hold the lid in the closed position by magnetic force; wherein: the housing and the lid are formed respectively by folding of at least one blank of sheet material; the magnetic closing components are printed/coated onto at least one surface of the sheet material; and at least one of the magnetic closing components has a pull force to surface area ratio of at least 5 g/cm².
