Abstract (en)

[origin: WO2016139407A1] The invention relates to an insulation element (1) comprising at least one roll (2), or at least one panel, of insulating material (3), such as glass wool or rock wool, said insulation element (1) further comprising at least one label (5) comprising an outer film (50) having an upper printed face and a layer of adhesive material located under said outer film (50), said label (5) being applied against a surface (10) of said insulation element (1) and adhering to said surface by means of said layer of adhesive material, said label (5) having a handle (6) for manually picking up said insulation element (1), characterised in that said label (5) comprises at least two longitudinal incisions (54, 54') that both pass through said outer film (50) and said layer of adhesive material through the whole of the respective thicknesses thereof, and a portion of support film (52) that is located at least partially between said two longitudinal incisions (54, 54') and under said layer of adhesive material.
