Abstract (en)

[origin: WO2016139529A1] The present invention relates to metallized textile substrates such as e.g. woven fabrics, non-woven fabrics and knitted fabrics, comprising or alternatively consisting of natural fibers of proteic or vegetable origin and fibers of artificial and synthetic origin, having conductivity and electromagnetic shielding properties as well as other intrinsic properties of metals used, such as e.g. the antibacterial property that can be imparted to a textile substrate using silver. The present invention further relates to a process for preparing said metallized textile substrates. The present invention eventually relates to an apparatus for preparing said metallized textile substrates.
