Abstract (en)
[origin: WO2016138932A1] An auxiliary hood lock for a holding a vehicle hood in a closed position is provided. The auxiliary hood lock includes catch engagement means comprising a lever interface portion, the catch engaging means being configured to engage a catch attached to a chassis of the vehicle, lever means comprising an engaging portion configured to operably engage the catch engagement means at the lever interface portion, first resilient means configured to bias the catch engagement means toward an engaged position with the catch, and second resilient means configured to bias the lever means toward a release direction of the auxiliary hood lock.
