Abstract (en)
[origin: CA2977567A1] The invention relates to a fastening element (1), comprising an insertion segment (2) for inserting into a bore, having a self-tapping threaded segment (3) having an external thread (8) for screwing and tapping into the bore on a fastening object, and comprising a mounting segment (5) for arranging outside of the bore (19), having an interface geometry (12) for applying a torque to the fastening element (1), wherein it should be possible to fix a fixing part to the fastening element (1) in a simple manner. This aim is achieved in that the mounting segment (5) is additionally provided with a fixing device (9) for indirectly or directly, in particular interlockingly and/or frictionally, fixing a fixing part on the mounting segment (5).
