Abstract (en)

[origin: WO2016141014A1] A portable device is provided. The portable device may include a display; an input device; a camera; a processor coupled to the display, the input device, and the camera; and a computer readable medium coupled to the processor, the computer readable medium comprising code, executable by the processor, to implement a method comprising: receiving authentication data from the input device, determining whether the received authentication data matches authentication data associated with an authorized user, and displaying, on the display, a credential, an item, and data associated with the item.
