Abstract (en)
[origin: WO2018007022A1] A process and a plant are specified, with which free fatty acids can be obtained in a simple manner by hydrolysis of fatty acid alkyl esters, especially fatty acid methyl esters (FAME), or alternatively of fatty acid triglycerides present in oils and fats of vegetable and animal origin. According to the invention, a portion of the free fatty acids already produced is recycled back into the reaction mixture, which results in self-acceleration of the hydrolysis reaction.

Abstract (de)
Es wird ein Verfahren und eine Anlage angegeben, mit denen freie Fettsäuren in einfacher Weise durch hydrolytisches Spalten von Fettsäurealkylestern, insbesondere Fettsäuremethylestern (FAME), oder alternativ von in Ölen und Fetten pflanzlicher und tierischer Herkunft enthaltenen Fettsäuretriglyceriden, erhalten werden können. Erfindungsgemäß wird dabei ein Teil der bereits erzeugten freien Fettsäuren wieder in das Reaktionsgemisch zurückgeführt, wodurch es zu einer Selbstbeschleunigung der Hydrolysereaktion kommt.
