Abstract (en)
[origin: CN107587798A] The invention relates to a motor vehicle lock (3) comprising a locking mechanism (5) with a rotary latch (6) and pawl (7), actuating lever means (8), a drive motor (8) for operating the locking mechanism (5) and / or the actuating lever means (8) and a lock housing (10), wherein the lock housing (10) at one of its side edges (11) has a recess (12) which extends in the direction of the center of the lock housing (10). A plug-in cover (14) further has a receiving pocket 15 which has an access opening (17) on one side edge (16) and the side edge (19) opposite the access opening (17) extends in the direction of the center of the receiving pocket (16). 15) extending slot (18), wherein the lock housing (10) at least partially with the incision (12) in front through the access opening (17) into the receiving pocket (15) of the plug-in cover (14) is inserted inserted such that the rotary latch jaw (6a) can be pivoted into both the slot-shaped recess (12) of the lock housing (10) and into the slot (18) of the receiving pocket (15) for fixing a closing part of the motor vehicle (1).
