Abstract (en)  
[origin: WO2016146549A1] The invention relates to an electromotive furniture drive for adjusting at least one part of an item of furniture, with at least one drive unit (20) which comprises a drive motor (21), a transmission (22) and a spindle drive which acts upon a pressure slide (25) which can be displaced along a displacement path. Said electromotive furniture drive is characterized in that a pressure head (26) mounted in a floating manner is associated with a base body (251) of the pressure slide (25).
