Abstract (en)
[origin: US2017027809A1] The invention relates to a stimulation device (1) for erogenous zones, in particular for the clitoris (12), wherein the stimulation device (1) has the following: at least one pressure field generating arrangement (2) with at least one first chamber (3) and at least one second chamber (4) having at least one opening (42) for placing on a body part (11); at least one connection element (5) that connects the first chamber (3) to the second chamber (4); a drive unit (6) that varies the volume of the first chamber (3) such that a pressure field that serves for stimulation is generated via the connection element (5) in the second chamber (4); a control device (7) that activates the drive unit (6), and an appendage (140).
