Abstract (en)  
[origin: WO2016142200A1] The present invention relates to a labelling device (30; 50; 60; 70; 120) for containers (14), comprising a conveyor (31) for the containers, the conveyor having at least one endless elongated conveyor element (32; 82) that is divertable, runs between at least two diverting stations (34, 36; 72, 74) and comprises holding elements (82; 96, 98) for the containers (14). The labelling device further has an inlet/outlet region for supplying containers (14) to the conveyor (31) and removing the containers from the conveyor. At least one labelling station, preferably at least two labelling stations (22a-22h), is/are arranged between two of the diverting stations along the conveyance path of the conveyor element.
