Abstract (en)

[origin: WO2016142899A1] The present invention relates, on the one hand, to a fabric guiding device (1) for a face-to-face weaving machine, comprising a cutting knife (8) and an upper bridge (2) and a lower bridge (3) which are positionable at adjustable distances from one another and from the cutting knife (8) by means of drive means (4a; 4b). On the other hand, the present invention relates to a method for displacing a lower bridge (3) and/or an upper bridge (2).
