Abstract (en)
The invention relates to an unmanned aerial or submarine vehicle (UV) (1) comprising at least: - at least one, particularly not more than, particularly exactly, two propulsion modules (20, 21), each comprising means for propulsion (30) of the UV (1), - a body (2), - wherein the propulsion modules (20,21) are linked with the body (2) such that each of the propulsion modules (20, 21) is rotatable (101) with respect to the body (2) at least around a pitch axis (100) of the UV, wherein the UV (1) is designed such, that during flight or underwater motion the body (2) is rotatable (101) around the pitch axis (100) independently of the orientation of the means for propulsion (30).
