Abstract (en)
A spinning machine includes a spinning device (9) adapted to produce a spun yarn (10), a draft device (7) adapted to draft a fiber bundle (8) by draft rollers (16, 17, 19, 20) and to supply the drafted fiber bundle (8) to the spinning device (9), a winding device (13) adapted to wind the spun yarn (10) produced by the spinning device (9) into a package (45), a first detecting section (52) adapted to detect a tension of the spun yarn (10) travelling between the spinning device (9) and the winding device (13), and a second detecting section (57) adapted to detect a thickness abnormality of the spun yarn (10) that is spun with the spinning device (9). The first detecting section (52) and the second detecting section (57) are arranged between the spinning device (9) and a yarn accumulating device (12) or between the spinning device (9) and a yarn feeding device arranged to draw out the spun yarn from the spinning device (9).
