Abstract (en)
[origin: WO2016150536A1] The invention relates to a vise (1) for clamping a workpiece, comprising two clamping-jaw holders (2, 3) for holding one clamping jaw each for clamping the workpiece between the two clamping jaws, a stationary lower part (5), and a carriage guide for linearly slidably guiding at least one of the two clamping-jaw holders (2, 3), wherein the carriage guide has two guide rails (12, 13), which are fastened to the lower part (5). According to the invention the guide rails (12, 13) of the carriage guide are fastened to the lower part (5) laterally.
