Abstract (en)

[origin: WO2016146491A1] A package for smoking articles, a blank for forming a collar part and a lid part of the package and a method of forming the package from such a blank is provided. The package (100) comprises: a packet part (110) for storing smoking articles; a collar part (120); and a lid part (130); wherein: the packet part is made of a substantially flexible material; the collar part and the lid part are made of a substantially rigid material; the collar part is attached to the packet part and partially overwraps the packet part; and the lid part is arranged such that it may move relative to the collar part and the packet part between a closed position, in which the lid part restricts access to any smoking articles contained in the packet part, and an open position, in which the lid part does not restrict access to any smoking articles contained in the packet part.
