Abstract (en)

[origin: WO2016154014A1] A ballistic barrier partition system. The system has a substantially rectangular frame in which two parallel opposing sides, a top side and a bottom side defining an opening. Two keyhole brackets are attached to an interior of of the partition frame on each of the opposing sides. The keyhole brackets have a plurality of keyhole-shaped openings spaced at along the length of the keyhole brackets. The system also includes a substantially rigid ballistic barrier panel, substantially the same size as the opening and having embedded in a plurality of fasteners aligned with and received by the keyhole-shaped openings.
