Abstract (en)

[origin: WO2016146631A1] Covering panel for external building faces, comprising a support (10) provided with a base (14) having a polygonal profile and a perimetric wall (16) which rises from one side of the base (14) so as to define a seat (17) in which is accommodated thermally insulating material (36); a ventilated chamber (18), which is superimposed on the base (14) on the opposite side with respect to the seat (17), has the same polygonal profile arranged offset along two adjacent sides for the interlocking coupling of a plurality of identical panels fixed to an external building face to be covered (W).
