Abstract (en)
[origin: WO2016146338A1] The invention relates to a charge carrier (10) for the defined arrangement of processed objects, wherein the charge carrier comprises as components at least a support grid (11) with a plurality of receiving elements for receiving objects, wherein the receiving elements are connected in a form-fitting manner to the support grid via a plug-in connection. The receiving elements are designed as adapters (25) for the positioned, individual reception of the objects, wherein the adapters are accommodated for the positioned arrangement in adapter receptacles of the support grid.
