Abstract (en)

[origin: WO2016146851A1] The invention relates to a thermal battery (1), in particular for a motor vehicle, configured for a heat-transfer fluid to pass therethrough, and comprising a heat-storage material. According to the invention, the thermal battery (1) comprises: at least one first heat-exchange compartment (3A) and at least one separate second heat-exchange compartment (3B), each heat-exchange compartment (3A, 3B) being in fluid communication with an associated intake (17) and an associated outlet (19) for a dedicated heat-transfer fluid, and also comprising an associated heat-storage material, for a heat exchange between the dedicated heat-transfer fluid and the associated heat-storage material. The invention also relates to the use of such a thermal battery (1) in at least two separate heat-management loops, in particular in a motor vehicle.
