Abstract (en)

[origin: WO2016146193A1] The invention relates to an assembly of a gas-tight compartment (1a) and an optical voltage sensor that further comprises a module (1c). The module (1c) comprises an electro-optic crystal (9) and electrodes (7, 8), wherein the electro-optic crystal (9) is the only element of the module (1c) to mechanically connect the two electrodes (7, 8) and to bridge the potentials of the two electrodes (7, 8). The assembly is particularly suited to measure direct current voltages.
