Abstract (en)

[origin: WO2016146421A1] The invention relates to a method (200) for maintaining vehicles offered for shared use on a plurality of sites, said method comprising at least one iteration of the following steps: - signalling (204) of at least one item of state data relating to a state of said vehicle or of a component of said vehicle; - determining (208), as a function of said at least one item of state data, at least one vehicle state parameter associated with said vehicle; said method (200) further comprising at least one iteration of a phase (212), termed the "servicing" phase, comprising the following steps: - selecting (216) at least one site, depending on the vehicle state parameters of at least the vehicles present at said at least one site, - performing (218) a maintenance operation of at least one vehicle at said selected site.
