Abstract (en)
[origin: WO2016146538A1] Disclosed is a modular terminal block, in particular a multi-level terminal block (1), for clamping a plurality of jumper wires which can be led thereto in an orderly fashion using a comb-type structure (2). The comb-type structure (2) can be put together from separate bars (21) that have clip-on portions (3) and cooperate with mating clip-on portions (4) on the terminal block such that the bars (21) can be removed from the terminal block when no comb-type structure (2) is needed.
