Abstract (en)

Sanitary device, comprising a ring- or U-shaped seat (2), an electric heating element (10) arranged at or within the seat (2), a power unit (8) adapted to provide an operation power to the heating element (10) and a control unit (13) adapted to control the operation power provided by the power unit, whereby a resistor (11) is connected or connectable in series to the heating element (10), whereby the control unit (13) is adapted to measure a voltage on a measuring point (19) between the resistor (11) and the heating element (10) in a connected state and to control the operation power depending on the measured voltage.
