Abstract (en)
A thermal spraying device is provided according to the present application, which includes an electric arc spraying device (06), a rotatable worktable (01), spraying tools (02), wire placing racks (07) and a master controller (08). The electric arc spraying device (06) is arranged at a periphery of a rotatable worktable (01), the spraying tools (02) are arranged on the rotatable worktable (01) in a circumference direction, and each of the spraying tools is driven to rotate by a motor (013). The wire placing racks are arranged at an outside of the rotatable worktable, and each of the wire placing racks corresponds to one electric arc spraying device. The master controller is connected to the rotatable worktable to control the rotatable worktable.
