Abstract (en)
[origin: CN207359917U] The utility model relates to a machine for automizing ground manufacturing book sclerderm front cover, this machine include at least one sizing equipment who has controllable adhesive coating nozzle, and this sizing equipment is used for coating at least one with the adhesive on the sticky base, wherein, the adhesive coating nozzle signal line through being used for received signal and covering making machine's central control unit at least is connected. Can control the adhesive deposited with simple mode begins and finishes from this specifcly to with simple mode not only follow product to product during the continuous production and also in the product variable deposited adhesive film, and realize coating and sticky base transport speed's simple adaptation.

Abstract (de)
Maschine zur automatisierten Herstellung von Bucheinbanddecken mit einer wenigstens eine steuerbare Klebstoffauftragsdüse aufweisenden Beleimeinrichtung zum Auftragen von Klebstoff auf wenigstens einen der Kleblinge, wobei diese Klebstoffauftragsdüse wenigstens durch eine Signalleitung zum Empfangen von Signalen mit einer zentralen Steuerung der Deckenmaschine verbunden ist.
