Abstract (en)

[origin: WO2016150712A1] The invention relates to a window frame (I) for an insulating glass window, at least comprising a first window frame element (109), a second window frame element (110), which is arranged opposite the first window frame element (109), a third window frame element (113), and a fourth window frame element (114), which lies opposite the third window frame element (113), wherein the first window frame element (109) has a catch spring (111), which can be connected to a connecting device (7) in the form of a groove (112) in an end face of an insulating glass unit (II), and the second window frame element (108) has a connecting element (8), which can be connected to a connecting device (7) on an end face of an insulating glass unit (II).
