Abstract (en)
[origin: WO2016153417A1] An armature fastener comprises magnets (121, 121', 131, 131'), facing in both a sideways direction and in upward direction for allowing the armature fastener to be fastened onto a ferromagnetic structure comprising a downwardly facing surface and a surface facing sideways. The armature fastener further comprises a connector (140) for connection to an electrical grid, wherein the connector (140) is internally wired to a system track (150) for connection to an armature being provided with a connector for connection to such system tracks.
