Abstract (en)  
[origin: WO2016151050A1] A method for providing content comprises receiving a selection instruction for selecting a set of content items comprising at least a first content item and a second content item, receiving a content reproduction instruction to reproduce the first content item, and starting providing of the first content item at a first random position or at a first predetermined position. When an instruction to switch reproduction to the second content item is received, providing of the first content item is finished and providing of the second content item is started, and a first reproduction position is shifted, while the second content item is provided, the first reproduction position corresponding to the position at which providing the first content item is to be resumed when an instruction to switch reproduction to the first content item is received.
