Abstract (en)

[origin: WO2016150598A1] The invention relates to a gearbox control device (10) for a gearbox (44) of a vehicle, comprising: a central module (12) having a carrier plate (18), electronic components (20) arranged on said carrier plate (18) and a housing (22) for said electronic components (20), said carrier plate (18) comprising an opening (36) for receiving a securing means (34) for securing the central module (12) to said gearbox (44); at least one peripheral module (14) which carries additional electrical and/or electronic components (28) of the gearbox control device (10); and at least one flexible conductive foil (16) which connects the central module (12) to the peripheral module (14). The peripheral module (14) comprises an additional carrier plate (26) on which the additional electrical and/or electronic components (28) are arranged, the carrier plate (26) having an additional opening (36) for receiving an additional securing means (34) for securing the peripheral module (14) to the gearbox (44).
