Abstract (en)
The method according to the invention, for making a concealed vent for ventilation, heating or air conditioning systems, comprises the following steps: A) providing a ventilation conduit (15) for feeding or drawing air in an environment (A) to be ventilated, heated or cooled; the ventilation conduit (15) is concealed inside a wall (P) which delimits the environment (A) and exits outside the same through a wall opening (7); B) providing at least one fixing spacer (11'); C) providing a diffuser panel (9) located in front of the wall opening (7) concealing it and allowing the air coming from the ventilation conduit (15) to come out from the opening (7) and be introduced in the environment (A); where the at least one fixing spacer (11') allows to reversibly adjust the mutual position between the at least one spacer fixing zone (21) and the at least one spacer-supporting zone (110).
