Abstract (en)
[origin: WO2016157046A1] A protective helmet (1) is described, said helmet comprising one or more air guiding members (20) configured to place in fluid communication at least one area of the helmet (22) with one or more ventilation ports (6) for output/expulsion of air so as to define an area intended for the passage of air flow independent from, and/or isolated, and/or not in fluid communication with, other areas intended for the passage of air flows in the helmet.
