Abstract (en)  
[origin: WO2016155836A1] The present invention relates to a water outlet device (10), in particular for connecting to a flexible tube. The water outlet device (10) comprises a first casing (12), a second casing (14) and a perforated disc (16). The first casing (12) and the second casing (14) are moveable to each other along an axis (28). The perforated disc (16) is arranged or arrangeable at a front side of the first casing (12). The border of the perforated disc (16) is attached or attachable at a front edge of the first casing (12). The centre of the perforated disc (16) is attached or attachable at a front portion of the second casing (14). The perforated disc (16) is made of a flexible sheet. The perforated disc (16) is adjustable between a concave shape and a convex shape, when the first casing (12) and the second casing (14) are moved to each other along the axis (28).
