Abstract (en)

[origin: WO2016155868A1] The invention relates to a lighting system for an interior module (1, 51) in a vehicle, comprising at least one illumination source, at least one optical waveguide (63, 75, 83), and at least one radiating element (65); the at least one optical waveguide (63, 75, 83) is arranged on a main frame (50, 61, 71, 81) of the interior module (1, 51), and the radiating element (65), which is optically coupled to the optical waveguide (63, 75, 83), is to be supplied with light generated by the at least one illumination source. The invention further relates to a corresponding production method.
