Abstract (en)  
[origin: WO2016156521A1] A method for installing an injection line (270) into a sea water suction hose is disclosed. The sea water suction hose has a number of interconnected hose sections (201a-f), and the method comprises the steps of: pulling the injection line (270) through line receiving elements (260) of the hose sections (201a-f) from the top section (201a) of the hose to the bottom section by means of a guiding strand (230a-b) led around a strand guiding means; and connecting the injection line (270) to a spreader at the end of the sea water suction hose.
