Abstract (en)
[origin: WO2016159911A1] This invention is related to a new bridge and production method thereof providing that sound with high tone and sound character quality is obtained as a result of the production of the bridge(threshold) used in the violin family of the stringed instruments from ram horn and buffalo horn. The ram and buffalo horn bridge increases characteristics and beauty of timbre, an archaized sound quality is obtained when it is used on the violin, viola, cello and contrabass.
