Abstract (en)
[origin: WO2016188586A1] The invention relates to an arrangement (2) for transmitting electrical energy from an energy-generating installation (3) arranged in a body of water (1), to the bank (15) of said body of water. The arrangement comprises a first electrical conductor (7) extending from the energy-generating installation (3) to an electrical device (9), and a second electrical conductor (13) extending from said electrical device (9) to the bank (15) of the body of water. Said electrical device (9) is incorporated into at least one housing (20, 21, 22, 23, 24) arranged on the bed (11) of the body of water. The arrangement comprises a surfacing means (504, 506, 508, 603, 605) to allow said at least one housing (20, 21, 22, 23, 24) to rise up to the surface (27) of the body of water.
