Abstract (en)

[origin: WO2016156724A1] The invention relates to a standalone device for recording and transmitting images and/or control data, comprising at least one image sensor associated with recording means; a unit for communicating images and/or control data to a remote server; a control unit for sequencing the recording and communication of images and/or control data; and a unit for generating and storing energy that is able to temporarily provide the operating power of the device after a predetermined point in time.
