Abstract (en)

A compact container for receiving two types of cosmetic materials enables a user to use two types of cosmetic materials in one compact container as a first impregnating member is received in an inner container, and a second impregnating member is received in an inner container lid. The compact container includes an outer container (10) having an open upper portion, an outer container lid (20) coupled to one side of the outer container (10), an inner container (30) having a first receiving space (31) in the outer container (10), and an inner container lid (60) coupled to one side of the inner container (30) and having a second receiving space (65). The second receiving space (65) faces the first receiving space (31), and the second receiving space (65) and the first receiving space (31) are sealed together when the inner container lid (60) is covered on the inner container (30).
