Abstract (en)

A valve assembly (3) for an injection valve (1) comprises - a valve body (4) with a central longitudinal axis (L) comprising a cavity (9) with a fluid inlet portion (5) and a fluid outlet portion (7), - a sealing ball (15) axially moveable in the cavity (9), the sealing ball (15) interacting with a valve seat (17) at the fluid outlet portion (7) to prevent a fluid flow through the fluid outlet portion (7) in a closing position and to release the fluid flow through the fluid outlet portion (7) in further positions, wherein the sealing ball (15) serves as an armature for an electro-magnetic actuator unit (18) of the injection valve (1).
