Abstract (en)  
[origin: JP2018021552A] PROBLEM TO BE SOLVED: To provide a method for operating an undulating diaphragm pump and a system for operating an undulating diaphragm pump, which enable the use of an undulating diaphragm pump to be optimized by reducing the energy consumption of the undulating diaphragm pump and increasing the performance thereof. SOLUTION: The present invention relates to a method for operating an undulating diaphragm pump 2 comprising an undulating diaphragm 7 and actuating means 9 of the undulating diaphragm 7 electrically powered according to a given frequency and/or voltage to make the undulating diaphragm 7 oscillate and undulate. The method comprises modifying the electrical supply frequency and/or voltage of the actuating means 9 according to at least one operating parameter, determined in advance, of the undulating diaphragm pump 2. SELECTED DRAWING: Figure 1

Abstract (fr)  
La présente invention concerne un procédé de pilotage d'une pompe à membrane ondulante (2) comprenant une membrane ondulante (7) et des moyens d'actionnement (9) de la membrane ondulante (7) alimentés électriquement selon une fréquence ou une tension donnée pour faire osciller et onduler la membrane ondulante (7). Selon l'invention, le procédé consiste à faire varier la fréquence et ou la tension d'alimentation électrique des moyens d'actionnement (9) en fonction d'au moins un paramètre de fonctionnement, préalablement déterminé, de la pompe à membrane ondulante (2).
