Abstract (en)

[origin: WO2016164281A1] Powered recliner chairs are currently available that operate individually, such that an occupant of the respective chair may reorient the respective chair between an upright orientation and a reclined orientation via a local control. Powered recliner chairs, assemblies for use in the chairs, and components for use in the assemblies are provided. Control systems and methods for operating powered recliner chairs are also provided. Any given chair may be locally and/or remotely controlled.
