Abstract (en)

[origin: WO2016162358A1] The invention relates to a motor-driven vehicle, in particular a two-wheel or a three-wheel vehicle, comprising at least one foot board (8, 11) which extends in the region of the vehicle chassis (1) substantially between the area of a vehicle seat (5) and a cockpit area (7) in the longitudinal direction of the vehicle, wherein said foot board (8, 11) is made of a first portion (9), which is sloping slightly obliquely downward in the direction of travel and is situated at the level of the front end of the seat area (5) of the driver, and an adjoining second portion (10) which rises upwardly in the direction of the cockpit area (7).
