Abstract (en)
[origin: WO2016162235A1] The present invention relates to a laundry treatment appliance (100) comprising a washing tub (105) and a discharge line (111) for discharging washing liquor from the washing tub (105), wherein the discharge line (111) comprises a first line section (135) and a second line section (137). The laundry treatment appliance (100) comprises a self-supporting guide element (115) for guiding the discharge line (111). The self-supporting guide element (115) comprises a first guide section (117) which is in contact with the first line section (135), and a second guide section (119) which is in contact with the second line section (137). The first guide section (117) and the second guide section (119) are rigidly connected. The self-supporting guide element (115) is designed to hold the first line section (135) in a bent manner in relation to the longitudinal axis (141) of the second line section (137).
