Abstract (en)
[origin: WO2016162161A1] The invention relates to a method for operating a fuel injector having at least one injection opening controlled by an injector needle (25). Pressure changes during opening and/or closing of the injector needle (25) or a switching valve are determined by means of a sensor (60). The temperature of the fuel injector is determined on the basis of a signal of the sensor (60).
