Abstract (en)
[origin: WO2016093715A1] The invention solves the problem of construction while it provides easy and safe transport and assembly as well as infinitely variable positioning of audiovisual while maintaining a stable position of the device in all phases of assembly. The workshop table characterized in that the bearing wall is equipped (5) with an assembly segment (7) especially for the audiovisual devices, having a mounting bearing element (9) with the help of two-segment guides unit (11) hinged together and is supplied with horizontal regulation mechanism (13) which has a slider (14) with mounting bracket (15) and blocking elements (16) and it has vertical regulation mechanism (17) with guide rail (18), spring element (19) and tension device (21). Moreover it is equipped with spacer mechanism (24) determining the power of releasing the audiovisual device. The bearing wall (5) ends with pivotally embedded bracket (6) with LED lighting. The guides unit (11) of the supporting segment (8) has shaped profiling (11a) in the area of joint (12).
