Abstract (en)

[origin: CN107438991A] A method and an apparatus for flexible broadcast service over multimedia broadcast multicast service (MBMS). The method includes transmitting a request for a location of content to a server. The method also includes when a MBMS is available for the content, receiving a MBMS delivery description for the location of the content, and joining session for the MBMS that carries the content based on the MBMS delivery description. The method further includes receiving a non-MBMS uniform resource locator (URL) for the content when the MBMS is not available for the content.
