Abstract (en)  
[origin: WO2016164942A1] The invention relates to an arrangement (1) comprising a first drive device (2) for moving a movable furniture part (3), a second drive device (7) for moving the same movable furniture part (3), a synchronization device (6) for synchronizing the two drive devices (2, 7), wherein the two drive devices (2, 7) can assume different positions during the movement of the movable furniture part (3), and a correction device (50), by which both drive devices (2, 7) can be brought into the same position.
