Abstract (en)
[origin: WO2016167813A1] Presented is a system for adjusting the handlebars on a vehicle. The system has a means for actuating a first mechanism to effect rotation of the handlebars about a first axis in response to a control signal; a means for actuating a second mechanism to effect translation of the handlebars along a longitudinal axis in response to a second control signal; and means for providing the first and second control signals.
